Clinical Veterinarian - Training and Research
43437BR
Campus: Tempe
Clinical Veterinarian

Job Description
The Department of Animal Care Technologies seeks applications for the position of Clinical Veterinarian for Training and Research Support. In this position, the veterinarian will work under the head of the Research Support Service (RSS) group to provide hands-on training and procedural services to investigators as well as develop standard institutional guidelines for commonly used procedures. The veterinarian will serve a major role in the Institutional Animal Care and Use Committee’s post-approval monitoring program to include training investigators on various skills such as aseptic technique, post-surgical care, and understanding regulatory requirements. While not a primary function of the position, the veterinarian will also provide back-up support to the Clinical Veterinary Team including some weekend and holiday emergency on-call coverage. Group to provide hands-on training and procedural services to investigators as well as develop standard institutional guidelines for commonly used procedures. The veterinarian will serve a major role in the Institutional Animal Care and Use Committee’s post-approval monitoring program to include training investigators on various skills such as aseptic technique, post-surgical care, and understanding regulatory requirements. While not a primary function of the position, the veterinarian will also provide back-up support to the Clinical Veterinary Team including some weekend and holiday emergency on-call coverage.

ASU is an AAALAC International accredited research intensive institution with a rapidly growing biomedical research component in addition to a well-established basic research element. The ASU Animal Care and Use Program, including the Department of Animal Care and Technologies, emphasizes a “compliance as a service attitude” to support both the well-being of the animals and progressive research. The University has a diverse animal census including non-human primates, dogs, rodents, rabbits, birds, reptiles, amphibians, and fish that occupy over 70,000 square feet of animal facilities. The successful candidate will work with the Attending Veterinarian, other staff of the department, other university units, and research faculty and their staff to ensure that investigators who use animals possess the proper skills needed to promote animal well-being and research progress.
